

COMPARATIVE SHOPPING #1— FILLED OUT

TEACHING TIPS:

- Change the instructions to provide more opportunities for practice. For example, have the student circle the most expensive price one day, and the least expensive the next. Or have the student circle the price that costs the most one day, and the price that costs the least the next. Adapt instructions depending on the individual student.
- Adjust the product amounts to make them easier or harder depending on the student’s skill level. It’s much easier to determine the most expensive price of items with different dollar amounts than it is with items that have the same dollar amount but different change. For example, prices \$1.45, \$3.17, and \$5.20 are easier to distinguish than prices \$1.40, \$1.39 and \$1.04.
- Remember to change the amounts to reflect the Next-Dollar Strategy phase the student is working on.
- Refer to the student’s list of sight words for words/items the student is working on.

Student: _____

Year: _____

	Item	Brand #1	Brand #2	Brand #3
1)	Hamburger	\$1.99	\$2.56	\$1.79
2)	Buns	\$2.30	\$2.78	\$2.15
3)	Honey	\$1.59	\$1.66	\$1.79
